About fifty shoe lathers left the factory Wednesday afternoon of last week, causing a hold up in one department. The strikers do not ask in this case for higher pay, but that their weekly earnings will not be given them in damaged stock which damage as they claim is due to the quality of the material in the majority of cases and not to the blunders of the working men. Some Fantastic Crystals.

If you are a fancier of mineral specimens, you probably treasure one or more three or four inch crystals and fondly imagine that they are of unusual size. As common cabinet specimens go, they are certainly large enough, but as compared with real large mineral crystals they are as a mouse compared with an elephant. At the town of Grafton, N. H., they find the largest crystals known to the geologists and mineralogists. How large do you suppose these giants are? One, two or three feet long? Well, I guess so. A single specimen from that locality taken to Boston and deposited in the museum of the Society of Natural History weighed nearly 2 1/2 tons! Another, found at the same place, is the largest crystal in the world, so far as is known. It is a perfect six sided prism, having a circumference of 18 feet. Three weeks' labor by two men was expended in exposing this giant of the mineral kingdom. The crystal is of beryl, and according to estimates made by experienced quarrymen, weighs not less than five tons.—St. Louis Republic.

A Suggestion.

It was suggested by some one at the late Lonsville convention that women residing in market towns should open their clubrooms on market days for the benefit of the women who come into town. There is no question but that a pleasant and comfortable place in which to rest and lounge, if practicable, the idea is a good one, and women in surrounding places might by that means be interested in uniting and working for something most needed in their own community.

A Safe Note.

"Rastus, you infernal nigger, you told me that mule was perfectly safe, and when I went into the stable he nearly kicked the top of my head off."

"Yes, sah," I said, "the mule was safe, sah. But 'fo' his recollection, I didn't say miffin about wedder you was safe in his vicinity. Dat mule is able enough to be safe anywhar."—Indianapolis Journal.

Easton's Temple.

Gambling houses are temples where the most sordid and turbulent passions contend. There no spectator can be innocent. A card or a small square of ivory interests more than the loss of an empire or the ruin of an unfeeling group of infants and their nearest relatives.—Zimmermann.

ST. VITUS DANCE.

A Physician Prescribes Dr. Miles' Restorative Nervine.

Dr. Miles Medical Co., Elkhart, Ind.

My daughter Katie, aged 14, was afflicted last spring with St. Vitus dance and nervousness, her entire right side was numb and nearly paralyzed. We consulted a physician and he prescribed Dr. Miles' Restorative Nervine. She took three bottles before we saw any certain signs of improvement, but after that she began to improve very fast and I now think she is entirely cured. She has taken nine bottles of the Nervine, but no other medicine of any kind. Dr. Miles' Restorative Nervine, as used in his practice, is a most valuable remedy for St. Vitus dance, and is a most valuable remedy for St. Vitus dance, and is a most valuable remedy for St. Vitus dance.
